THE MAGAZINE OF SCIENTIFIC PROGRESS

VOLUME XXIV

Editor: ROBIN CLARKE
Mercury House, 103/119 Waterloo Road,
London, S.E.1.

INDEX 1963

PROFESSIONAL & INDUSTRIAL PUBLISHING CO. LTD.

AUTHORS INDEX

Allen, Roy, *Automatic landing nears adoption*, May 10

Barker, Dr S. A., *Bees and rheumatism*, August 28
Barker, Dr S. A., *Chemical protection from radiation*, June 24
Barker, Dr S. A. and Stacey, Professor M., *New keys to nature's codes*, Feb 36
Barrass, Dr Robert, *The jewel wasp*, Aug 10
Bowden, Professor F.P. and Chadderton, Dr L. T., *Radiation damage in crystals*, Apr 36
Brothwell, Don, *Where and when did man become wise?* June 10
Brown, Professor F., *How animals respond to magnetism*, Nov 18
Burch, Dr P. R. J., *Radiation and cancer*, Feb 16
Burtin, Will, *Shapes in science*, Nov 40

Cade, C. M., *Are we alone in space?* Apr 27
Cade, C. M., *Communicating with life in space*, May 36
Cade, C. M., *Human radiation as a medical tool*, Dec 14
Cade, C. M., *Navigation—man's debt to the animals*, Feb 22
Calder, Professor Ritchie, *Man against tomorrow*, Oct 43
Chadderton, Dr L. T. and Bowden, Professor F. P., *Radiation damage in crystals*, Apr 36
Cole, Dandridge, *The asteroids*, Nov 24
Crawford, Professor T., *Diseases of the arteries* May 16
Crook, Dr J. H., *Monogamy, polygamy and food supply*, Jan 35
Crossman, Richard, *A new policy for science*, Nov 12
Curtis, Dr A. S. G., *The cell surface—servant to the genes?* May 21

Daniel, Dr Glyn, *Tombs and temples of prehistory*, Jan 14
Dodge, Professor Barnett F., *Fresh water from the oceans*, July 35
Dorion, Dr G. and Weissbein, Dr L., *Photochromism*, Feb 32

Edholm, Dr O. G., *Man against the cold*, Oct 16
Engel, Raoul, *The revolution in toys*, Dec 48
Epstein, Dr A. L., *Tambu: a primitive shell money*, Dec 28
Erber, Professor Thomas, *The nature of magnetism*, Feb 10

Farley, Dr B. G., *A model of the brain*, Sept 28
Firsoff, V. Axel, *Limb regions of the Moon*, Feb 28

Gaskell, Dr T., *Underground tests: the next step*, Sept 10
Goodman, C. H. L. and Lees, Dr J., *Chemistry at very high pressures*, Aug 15
Gourdine, Dr M. C., *Nuclear power in space*, July 14
Grüneberg, Professor H., *From genes to characters*, Mar 38

Hafner, Dr E. M., *Gamma ray astronomy*, Apr 16
Harris, J. T., *Very high speed photography*, Aug 32
House, Dr M. R., *Evolution observed*, Sept 12
Howard, Laurence, and Yellott, John I., *Power from the sun*, Aug 38

Jackson, Dr A. H. and Kenner, Professor G. W., *Porphyrins—key molecules of life*, Jan 24
Jennison, Dr R. C., *Radio telescopes of the future*, July 20

Kay, Professor Herbert D., *Self-help for the hungry*, Aug 20
Kelly, Dr A., *The promise of fibre-strengthened materials*, Sept 22
Kenner, Professor G. W. and Jackson, Dr A. H., *Porphyrins—key molecules of life*, Jan 24
Kerslake, Dr D. McK., *Man against space*, Oct 30

Lees, Dr J. and Goodman, C. H. L., *Chemistry at very high pressures*, Aug 15
Lenchenko, Valentina, and Popov, Professor Boris, *Artificial limbs in the Soviet Union*, July 9

Macdonald, John, *Planning roads by computer*, Sept 18
Medwadowski, Dr Stefan, *Thin shell structures*, Nov 29
Meller, James, *A new look for structures*, Apr 22
Miles, Surgeon Captain S., *Man against the sea*, Oct 36
Montagnon, Philip, *Linear programming*, Sept 36
Montagnon, Philip, *Solving the queue problem*, Jan 30
Moore, Patrick, *Telescopes of the future*, Jan 21

Napier, Dr J., *Early man and his environment*, Mar 12
Newberry, C. W. and Wise, A. F., *How wind shapes buildings*, July 28

Osborne, Dr Daphne, *Hormonal control of plant death*, June 31
Oswald, Dr Ian, *Two kinds of sleep*, Nov 36

Pirie, N. W., *Human survival: the essential conditions*, Oct 10
Popov, Professor Boris, and Lenchenko, Valentina, *Artificial limbs in the Soviet Union*, July 9
Pugh, H. Ll. D. and Watkins, M. T., *New ways of shaping metals*, June 20

Ronan, Colin, *New regions of astronomy*, June 36

Sciama, Dr D. W., *The nature of gravity*, Mar 32
Shapiro, Professor M., *Primary cosmic rays*, Mar 20
Stacey, Professor M. and Barker, Dr S. A., *New keys to nature's codes*, Feb 36
Sudd, Dr J., *How insects work in groups*, June 15

Tatlow, Professor J. C., *The future for fluorine*, Mar 27

Waddington, Professor C. H., *From cell to embryo*, Apr 10
Walsh, Dr Donald, *The last gap in the spectrum*, Dec 37
Watkins, M. T., and Pugh, H. Ll. D., *New ways of shaping metals*, June 20
Watson, Dr W., *The changing face of the urban north*, May 28
Weiner, Dr J. S., *Man against the heat*, Oct 23
Weissbein, Dr L. and Dorion, Dr G., *Photochromism*, Feb 32
Whitehead, Dr F. H., *Adapting plants to wind and drought*, Sept 32
Wigglesworth, Professor V. B., *How insects survive extreme conditions*, Dec 43
Winckler, Professor John, *The Earth's magnetosphere*, Dec 20
Wise, A. F. and Newberry, C. W., *How wind shapes buildings*, July 28

Yellott, John I. and Howard, Laurence, *Power from the sun*, Aug 38

SUBJECT INDEX

Acclimatization: to cold, Oct. 20, 21;
to heat, Oct. 26, 28
Adenosine triphosphate (ATP) synthesis, Sept. 6
Adhesives, superstrength, Aug. 5
Aerodynamics and study of wind action, July 29
Aldosterone, Oct. 28
Aliphatic fluorine compounds, Mar 28, 29
Allen's rule, Oct 24, 25
Ammonites, Sept 12 et seq.
Animal conservation programme in Africa, Nov 5, 6
Animals' response to magnetism, Nov 18 et seq.: 'biological clocks and compasses,' Nov 19, 20; field strength, Nov 20, 21; geomagnetism, Nov 21; uses of information, Nov 21, 22
Anode problem in fuel cells, Aug 4
Antibiotics, Nov 6, 9
Anticlastic surfaces, Nov 33
Anticoagulant drugs, May 20
Anti-diuretic hormone, Oct 28
Anti-ferromagnetic crystals, Dec 42
Anti-gibberellins, Sept 34, 35
Anti-matter, Oct 6, 7: collision with matter, Oct 7
Ants: nest building, June 16, 17; transport of prey, June 17 et seq.
Apollo lunar flight programme, March 5; Aug 6; Nov 26, 28; Dec 8
Arctic, human adaptation in, Oct 17 et seq.: economic exploitation, Oct 21; investigations, Oct 20; 21
Ariel 1 satellite, Sept 4
Aromatic fluorine compounds, Mar 28 et seq.; Nov 7
Artefacts, use by primates, Mar 16, 17
Arterial diseases, May 16 et seq.: blood coagulation, May 18, 20; chemistry of, May 18; deaths from, May 17; lesions, May 17, 18
Artificial gravity and spaceflights, Oct 34, 35
Artificial limbs in U.S.S.R., July 9 et seq: direct control from brain, July 11; use of remaining joints, July 11
Artificial radiation belts, Dec 25, 26
Asphalt, use for weather control, Apr 4, 5
Asteroids, Mar 9; Nov 24 et seq.: as bases, Nov 25, 26, 28; capturing, Nov 27, 28; dangers from, Nov 24, 25; minerals from, Nov 26, 27; possibility of water on, Nov 25; production of propellants on, Nov 27
Astronauts: assessment of physical reactions, Aug 6; psychological problems, Oct 31
Astronomical satellite vehicle, Jan 22
Atheroma, May 17, 18
Atherosclerosis, May 17, 18
Aurora, cause of, Dec 27
Australopithecus, Mar 15
Auto-immunity and the rheumatoid factor, June 7
Automatic landing progress, May 10 et seq.
Autopilots, May 14
Auxins, September 34: and senescence of plants, June 33, 34; protein control by, June 35
Aziridinyl compounds and sterilization, May 6

Baboon behaviour, Mar 15, 16
Bacteria: and enzyme induction, Feb 36 et seq.; and food production from crude oil, Feb 4
Bats, navigation system, Feb 22 et seq.
Bees, navigation system, Feb 24, 25
Bee venom and rheumatoid arthritis, Aug 28 et seq.
Bergmann's rule, Oct 24, 25
Biochemical: control of sleep, Nov 39
Bioelectric: control of artificial limbs, July 12, 13; Sept 8; hands, July 12, 13; potential of living organisms, Sept 8
Biological clocks and compasses', Nov 19 et seq.
Biology, state of research and teaching, Mar 5, 6
Biospheres, artificial, May 40
Birds: behaviour, Jan 35 et seq.; navigation systems, Feb 25, 26; social organization and relevance to human society, Jan 41; stellar navigation by, Feb 25, 26
Birth control, new pills, Apr 6
Bistatic radar, Sept 9
Blind landing techniques, May 10 et seq.; autopilots, May 14; components and instruments, May 14; Experimental Unit (BLEU), May 11 et seq.
Blind persons, echo detection, Feb 24
Blood coagulation, May 18, 20
Body shape and climate, Oct 24, 25
Bonding plastics and metals, Mar 6; Aug 5
Brain mechanisms, Sept 28, 29; models simulated on computers, Sept 28 et seq.; waves (EEG), Sept 29, 31; Nov 36; working model, Nov 41
Breast cancer and thermal radiation, Dec 17
British Association meeting, 1963, Nov 10, 11
Burn injuries and thermal radiation, Dec 17

Caesium-137, increase in dietary intake, Nov 4
Cancer: and promine and retine compounds, Sept 4; and radiation, Feb 16 et seq.; chromosomes, Feb 6; inheritance factors, Feb 18 et seq.; models, Feb 17, 18; thermal radiation, Dec 17
Cannon firing on Moon, Nov 50
Carbon-14 dating, Jan 16
Carcinomata and thermal radiation, Dec 17
Carotenoids, Jan 25
Caterpillars, resistance to cold, Dec 46
Cell: bacterial, Apr 12; cultures, Apr 14, 15; development of, Apr 10 et seq.; division in space flight, Dec 12; grafting of cytoplasm, May 22; metaplasia, Oct 5, 6; model of, Nov 41; of higher organisms, Apr 12, 15; structure, Apr 13, 14
Cell surface: and development of embryo, May 21 et seq.; electron micrographs, Jan 10; structure, May 25
Ceramic fibres, Sept 25 et seq.
Chamber tombs, Jan 18
Chemical adaptation of plants to wind effects, Sept 34, 35
Chemical protection from radiation, June 24 et seq.; Aug 31; Oct 35
Chemistry and high pressure, Aug 15 et seq
Chlorophylls, Jan 24 et seq.; June 32; absorption spectra, Jan 26
Civil research, Trend Committee report, Dec 8, 10
Cockroaches, resistance to cold, Dec 45, 46
Cold: acclimatization to, Oct 20, 21; and blood circulation in hands, Oct 21; insect resistance to, Dec 45 et seq.
Communications satellites, Jan 9; Nov 50; Dec 4
Computers: Aldous, Jan 11; and brain models, Sept 28 et seq.; and road planning, Sept 18 et seq.; and shell building structures, Nov 31; Atlas, Jan 11; development schemes, Government support, Nov 9
Comsat agreement, May 4
Control of animals, 'crash' programme, July 6, 7
Coronary thrombosis, May 17 et seq.; incidence of deaths, May 17
Cortex: and genes, May 24, 25; grafting, May 23, 24
Cortical inheritance, May 22 et seq.
Cosmic rays: balloon experiments, Mar 23; detectors, Mar 23; energy spectrum, Mar 24, 25; helium nuclei, Mar 22; hydrogen nuclei, Mar 22; identification of nuclei, Mar 23, 24; isotopic composition, Mar 23; L-nuclei, Mar 23; origins and sources, Mar 25, 26; paths, Dec 22, 23; primary, Mar 20 et seq.
Crab Nebula, Mar 26; Apr 17 et seq.; Sept 6
CRD (chronic respiratory diseases) in poultry, antibiotic treatment, Nov 9
Crude oil, food from, Feb 4
Crustaceans, stellar navigation, Feb 26
Cryptobiosis in insects, Dec 47
Crystals, radiation damage, Apr 36 et seq.: June 5; explosions from fragments, Apr 41; paired dislocations, Apr 38, 39; production of defects, Apr 39, 40
Crystallization processes in desalination, July 40, 41
Cygnus A collision, Apr 17 et seq.
Cytochromes, Jan 24, 27
Cytoplasm, grafting of, May 22
Cytoplasmic inheritance, May 22, 24, 25

Decompression problems, divers', Oct 38, 39
'Decoupling' principle in underground nuclear tests, Sept 10
Deep heat treatment and submillimetric waves, Dec 41
Deformities in animals, inherited, Mar 39 et seq.
Dehydration problems in hot climates, Oct 28
Demography, Royal Society Symposium, Jan 7
Desalination of sea water, July 36 et seq.; Oct 46, 48; crystallization processes, July 40, 41; electrodialysis, July 39 et seq.; evaporation processes, July 37 et seq.; reverse osmosis, July 40, 41.
Desert areas: development of, Oct 23; human survival, Oct 23; insect survival, Dec 44, 45
Deuterium and fusion power, Oct 48
Devonian era, Sept 12 et seq.
Diamond synthesis through high pressure, Aug 15, 17 et seq.
Diet: calorie content, Aug 21; protein supplementation, Aug 21, 22, 25
Dihydroporphyrins, Jan 26
Diptera, navigation systems, Feb 26, 27
Discovery, oceanographic research ship, Mar 4
Diseases of the arteries, May 16 et seq.
Display behaviour in weaver birds, Jan 35, 37, 38
DNA and genetic code, Jan 10; Mar 38; May 21, 22
Dreaming, studies of, Nov 37, 38; rapid-eye-movements, Nov 38

Duodenal ulcers, incidence of, Jan 8
Dyestuffs and fluoro-aromatics, Mar 30, 31

Early man: environment and evolution, Mar 12 et seq.; functional complexes, Mar 13
Earth: evolution of life on, Apr 27, 28; magnetic field, Dec 21 et seq.; magnetosphere, Dec 20 et seq.; shape of, Dec 8; supply of water, July 4
Earth's crust and carrying of radio waves, Sept 5
Echo I and *II* balloons, Oct 8; Nov 50
Echo detection and location systems and animal navigation, Feb 22
Ecological: concept of pest control, Dec 12; status of early man, Mar 12 et seq.
Electric eels, navigation system, Feb 23 et seq.
Electricity from rats, Sept 8
Electrodialysis in desalination, July 39 et seq.
Electroencephalogram (EEG), Sept 29, 31; Nov 36
Electrohydraulic forming of metals, June 22, 23
Electrohydrodynamics (EHD), July 15
Electromagnetic: forces and waves, Mar 36, 37; forming of metals, June 22, 23; spectrum, Apr 16, 17; Dec 37 et seq.
Electro-thermal acceleration of spacecraft, July 15, 19
Embryonic development, May 21 et seq.
Encapsulation, and plastic structures in space, June 5, 6
Endoplasmic reticulum, Apr 13 et seq.
Energetic-synergetic geometry, Apr 23
Energy particles, ultra-high, Mar 21 et seq.
Environment, poisoning the, May 8, 9
Enzyme: activity in plants, June 35; deficiency, Feb 37; in bee venom, Aug 28, 29
Enzyme induction: and hereditary diseases, Feb 36 et seq.; and memory mechanism, Feb 7
Eros asteroid, Nov 26 et seq.
Eskimos: adaptation to cold, Oct 17 et seq.; housing, Oct 19; technology and diet, Oct 18, 19
Evaporation processes in desalination, July 37 et seq.
Evolution: in fossils, Sept 12 et seq.; of life on earth, Apr 27, 28; of stars, Apr 28, 29
Exobiology, May 8
Explorer satellites, Dec 23 et seq.; gamma-ray research, Apr 19 et seq.
Exponential distribution and queuing theory, Jan 31 et seq.
Extragalactic radio sources, Apr 17
Extrusion of metals, hydrostatic, June 21, 22
Fall-out: caesium-137, Nov 4; figures, Feb 7, 8; iodine-131, Oct 4; Nov 4; strontium-90, Nov 4
Famine and hormone control of plants, June 35
Fibre - strengthened materials, Sept 22 et seq.; Dec 6: ceramic fibres, Sept 25 et seq.; ceramic whiskers, Sept 23, 24; Dec 6; 'compact' of fibres, Sept 24; surface flaws, Sept 22, 23
Fishing technology, developments, July 7
Fission fragments: bombardment of crystals, Apr 37 et seq.; explosions by, Apr 41
Fission in fossils, June 5
Flatworms, conditioned reflexes, June 6
Fluorine and fluoro-compounds, Mar 27 et seq.; Nov 7: as stain-stopper, Apr 5, 6; possible applications, Mar 30, 31; research, Mar 31
Flux, magnetic, Feb 14, 15
Foamed plastic soil, Nov 4, 5
Fontéchevade fossil studies, June 12 et seq.
Food: and population increases, Oct 45; biochemical engineering, Oct 14; novel forms, Oct 14; production and supply problems, Oct 12 et seq.; sea potential, Oct 46, 48; technology, Oct 13 et seq.
Food irradiation: information, Nov 50; laboratories, June 30
Foodstuffs, radioactive contamination, Nov 4
Fossil man: Mar 12 et seq.
Fossils: evolution in, Sept 12 et seq.; fission in, June 5
Fresh water, new supplies, Oct 46, 48
Fucidin antibiotic, Nov 6
Fuel cells: anode problem, Aug 4; for space vehicles, Aug 4; projects, Aug 4; use of paraffin, Aug 4
Fusion reactions, Apr 7

Galaxies: gravitational collapse, Apr 7; pairs in collision, Apr 17, 18
Gallium arsenide and optical transistors, May 4
Game reserves in Africa, Nov 5, 6
Gamma ray: and glass refining, July 8; astronomy, Apr 16 et seq.; fluxes, Apr 18, 20; from Sun, Apr 21; intensities, Apr 18; primary, Mar 23; source, Apr 16 et seq.
Gas turbines for cars, Aug 8, 9
Gazelle Peninsula, Dec 28 et seq.
Gemini space programme, Mar 5, 8; Aug 6; Nov 28
Genes, Mar 38 et seq.: and cell surface, May 24, 25; and cortex, May 24, 25; changes produced in proteins, Mar 41; control, Apr 10, 11; regulator, Apr 11, 12, 15; structural, Apr 11, 12, 15; unity of primary action, Mar 40
Genetic code, Jan 10; Mar 38; Apr 10; May 21
Genetics, advances in, Apr 10 et seq.
Geodesic structures, Apr 23 et seq.
Geological prehistory, dating through fossils, Sept 17
Geomagnetism, Nov 21
Geothermal energy, Oct 48
Germanium, 'p-type' cells, and fast-scanning systems, Dec 17
Germ-free laboratory, Feb 5
Gibberellic acid, Sept 34
Gibberellins and senescence of plants, June 33
Glass-refining with gamma-rays, July 8
Glide Path transmitters and aerials, May 11 et seq.
Glues, superstrength, Aug 5
Glycerol as 'anti-freeze' in insects, Dec 47
Goniatites, Sept 12 et seq.
Grafting problems, Aug 6, 7
Graphite - to - diamond transformation by high pressure, Aug 15, 17
Gravitational: fields, Mar 36, 37; forces, Mar 33 et seq.; waves, Mar 35 et seq.
Gravity: and theory of relativity, Mar 34 et seq.; artificial, and spaceflights, Oct 34, 35; nature of, Mar 32 et seq.
Growth rings in insects, daily, July 5, 6
Growth substances, Sept 34
Gurlt's Cube, May 41
Gymnotids, navigation system, Feb 23 et seq.

Haemoglobin, Jan 24, 28, 29; Mar 41
Heart valves, transplantation, Nov 7
Helium, properties and uses, Feb 5, 6
Hereditary diseases and enzyme induction, Feb 36 et seq.
High-altitude nuclear tests, Apr 6, 7; May 8, 9; Dec 25, 26
High-pressure fluids and extrusion of metals, June 21, 22
High pressures and changes of structure, Aug 15 et seq.; and organic compounds, Aug 19; apparatus, Aug 17, 18; production, Aug 17, 18; shock waves, Aug 16, 17
High-speed: films, Aug 36; photography, Aug 32 et seq.
High temperatures: insect resistance to, Dec 45; production, Aug 18; Sept 6, 8
Hominoid evolution, Mar 13, 14, 17, 18
Homo sapiens: cranial capacity, June 11, 12; fossil skulls, June 11 et seq.; time and place of development, June 10 et seq.
Hormones and famine, June 35; and prolongation of plant life, June 31 et seq.; antidiuretic, Oct 28; from roots, June 34; protein control by, June 34, 35; stimulation of roots, June 23, 34
Human survival: and cold, Oct 16 et seq.; and heat, Oct 23 et seq.; Dec 15; and the future, Oct 43, et seq.; and the sea, Oct 36 et seq.; essential conditions, Oct 10 et seq.; in space, Oct 30 et seq.
Hyaluronic acid, Aug 28 et seq.
Hydrocarbons, creation by geological processes, July 4, 5
Hydrostatic extrusion of metals, June 21, 22
Hygiene and ventilation and wind influences, July 33, 34

Image dissection in high-speed photography, Aug 36, 37
Image intensification, Aug 34
Immune response, Jan 10; Feb 5
Implosion devices and techniques, Feb 14, 15
Indium - antimonide cells and fast-scanning system, Dec 17
Industrial urban conditions, sociological survey, May 28 et seq
Inertia-less shutters in high-speed photography, Aug 33 et seq
Inertial forces, Mar 34 et seq: stars as physical sources of, Mar 34
Infra-red: radiation and diagnosis of disease, Dec 14 et seq.: region of spectrum, June 37, 38; scanners, Dec 14 et seq.
Injection lasers, Jan 6
Insect: daily growth rings, July 5, 6; diapause, Aug 14; pathogens and pest control, Dec 10, 12
Insect group behaviour, June 15 et seq
Insect survival in extreme conditions, Dec 43 et seq.: anti - freezing properties; Dec 46, 47; desert conditions, Dec 44, 45; hibernation, Dec 47; high temperatures, Dec 45; low temperatures, Dec 45 et seq; water conservation, Dec 44, 45; waterproofing waxes, Dec 44 et seq
Instrument landing system (ILS), May 11 et seq
Interferometers in radio astronomy, July 22, 23
Interstellar communication, May 37 et seq.: artificial biospheres, May 40; probes, May 39, 40; radioglyphs, May 39; transmission of signals, May 37 et seq; wavelength selection, May 38
Iodine-131 fall-out, Oct 4; Nov 4
Ion rockets for space craft propulsion, July 16, 18, 19; Nov 25
Ionizing radiation and cancer, Feb 16 et seq

Ionospheric: beacon satellite, Sept 8; focusing in radio telescope, July 23, 24
IQSY (International Years of the Quiet Sun), May 5, 6; Sept 9; Oct 8
Irradiation: and pest control, Nov 10; food laboratories and information, June 30; Nov 50; of crystals with fission particles, Apr 37 et seq.: of water in living cells, June 25
Isolation, long-term, effects of, May 6
Isotope tracer techniques, Jan 26

Jewel wasps, Aug 10 et seq.: and experimental genetics, Aug 14; behaviour study, Aug 14; mating and courtship, Aug 14; parasite and host problems, Aug 14
Jupiter, radio noise from, May 40
Juvenile delinquency, Jan 7

Kanjera fossil skulls, June 13, 14
Kerr effect in high-speed photography, Aug 34
Kidney - grafting research, Feb 5
Kinetin, protein control by, June 35

Labour Party's scientific policy, Nov 12 et seq
Lacro-tryptophan and control of sleep, Nov 39
Larvae, group behaviour, June 16
Lasers: beam, Jan 6, 7, 11; May 37; development, Jan 6, 7, 11; May 4, 37; Dec 37, 38; modulation of, Jan 6, 7, 11
Leaves: deficiency of hormones, June 34; fall and cellular death, June 31, 32; life span, June 32, 33
Leigh, sociological survey, May 28 et seq.: commercial and industrial changes, May 32, 33; community life, May 30, 33 et seq.: employment, May 33; national relevance, May 35; population pattern, May 30 et seq
Leukaemia and radiation, Feb 16 et seq
Light, bending of, Mar 36, 37
Linear programming, Sept 36 et seq.: operatives' ability, Sept 40; production problems, Sept 38, 39; rules of procedure, Sept 40; strategy planning, Sept 40; transport costs, Sept 39, 40
Localizer transmitters and aerials, May 11 et seq.
Locusts, survival in desert conditions, Dec 45
Long-term isolation, effects of, May 6
Low temperatures, survival in, Oct 16 et seq.: diseases, Oct 19; Eskimo technology and diet, Oct 18, 19; housing conditions, Oct 19; insect survival, Dec 45 et seq.: permafrost, Oct 17, 18; physiological and psychological problems, Oct 18 et seq
Lubricants, new, July 7
Lunar seismometers, Nov 50
Lung cancer, incidence of, Jan 8
Lyman-α lines, June 39, 40
Lymphocytes, and grafting problems, Aug 6, 7

Magnetic fields, study of, Feb 10 et seq.: absorption and dispersive characteristics, Feb 13; action in galactic space, Mar 24; animal response to, Mar 9; Earth's, Dec 21 et seq.: high, use of, Feb 13, 14; in interstellar space, Jan 8; Feb 4; interaction of, Feb 12, 13; over 100,000 gauss, Aug 4; space probe observations, Feb 4; ultra strong and ultra weak, Feb 14, 15
Magnetic flux, Feb 14, 15
Magnetic storms, Dec 22, 25, 27
Magneto hydrodynamics (MHD): generators, Feb 6, 7; power for grid, Dec 4, 6; use in space, July 15, 17
Magnetosphere, Earth's, Dec 20 et seq.: and aurora, Sept 27; cosmic ray paths, Dec 22, 23; impact of solar gas, Dec 22, 27; radiation belts, Dec 23 et seq.: radiation trapped within, Dec 23
Magnets from superconductors, Feb 13, 14
Malnutrition problems, Aug 21 et seq
Mariner II and *Mariner B* spacecraft, Feb 4, 5; Mar 7; Apr 5; Aug 50; Nov 24; Dec 27
Mars: infra-red studies, June 38; space-probe observations, Mar 7, 8; May 4; Aug 50; vegetation on, Apr 34
Mars I, space-probe, Mar 8; Nov 24
Mathematical analysis of queueing, Jan 31, 32, 33
Mating behaviour in weaver birds, Jan 37, 38
Megaliths, Jan 14 et seq
Memory mechanism and enzyme induction, Feb 7
Mercury spaceflights, Aug 5, 6; Nov 28
Metabolism model, Nov 40, 41
Metals, new methods of shaping, June 20 et seq.: electric discharges, June 22, 23; electrohydraulic forming, June 23; electromagnetic forming, June 23; high-pressure fluids, June 21, 22; hydrostatic extrusion, June 21, 22
Metaplasia, Oct 5, 6
Meteorites, study of, Mar 8, 9; Apr 33
Mice, inherited deformities in, Mar 39 et seq.
Microwaves and microwave valves, Dec 37, 38, 41, 42
Migrations of birds and animals, study from satellites, May 7
Miles Full Visibility Landing System, May 15
Milk schemes and protein-deficiency diseases, Aug 23 et seq.
Mohole project, June 6, 7
Monogamy in weaver birds, Jan 35 et seq.; and food supply, Jan 38, 39
Moon: absence of magnetic field, Feb 4; 'asphalt' theory, July 5; cannon firing project, Nov 50; communication between lunar explorers, Dec 4; librations, Feb 29; limb regions, Feb 28 et seq.; observatories on, Jan 22, 23; possible life on, Apr 34; Nov 7; probe programmes, Mar 5, 7; Aug 6, 50; Nov 6, 7; Dec 6, 8; robot travel-vehicle, Mar 5
Mount Carmel skulls, June 13, 14
Mud-snails, response to magnetism, Nov 19 et seq.
Mutagenic effects in spaceflights, Dec 12

Navigation, animal, Feb 22 et seq.; Mar 9; Nov 19: lessons for man, Feb 27; stellar, by birds, Feb 25, 26
Neanderthal man, June 12 et seq.
Nest material of weaver birds, Jan 40
Neutrinos, Jan 11; Mar 23
Niah Cave skulls, June 13, 14
Nimbus satellite, Oct 8
North Sea oil prospects, June 8, 9
Nuclear: explosions, high-altitude, Apr 6, 7; flash, protection by photochromism, Feb 33, 34; magnetic resonance (N.M.R.) studies, Jan 27; reactor and MHD generator, Feb 6, 7; tests underground, Sept 10, 11
Nuclear-electric systems, July 14 et seq.: EHD, July 15; electrothermal method, July 15, 16, 19; ion rockets, July 16, 18, 19; MHD, July 15, 17; plasma propulsion, July 16; specific impulse, July 17, 18; thermionic generator, July 14, 15
Nuclear power: and energy, Oct 48; in space, July 14 et seq.; Nov 5, 25

Oceanographic research, Mar 4
OECD and national science policy, Nov 4
Oil: origins of, July 4, 5; prospects in North Sea, June 8, 9
Olduvai Gorge, earliest stone tools, Mar 17, 18
Optical transistors, May 4
Orbital: jumps, June 37; telescopes, Jan 21, 23
Orbiting observatories, Apr 21; Sept 4
Organic synthesis, May 4, 5
Osmosis, reverse, in desalination, July 40, 41
Ozma, Project, May 38, 40

Palaeo-anthropology, Mar 12 et seq.
Palaeo-ecology, Mar 14
Paleolithic skulls, June 13, 14
Paraffins, use in fuel cells, Aug 4
Paranthropus, Mar 15
Parasite and host population problems, Aug 14
Particles, elementary, Jan 10
Pest control: and sterilization, May 6; Dec 10; chemical stimulants, Dec 10; insect pathogens, Dec 10, 12
Photochromism, Feb 32 et seq: applications, military and civil, Feb 33 et seq.; future prospects, Feb 35
Photogrammetry and road planning, Sept 20, 21
Photography, high-speed, Aug 32 et seq.: films, Aug 36; image dissection, Aug 36, 37; image intensifiers, Aug 34; inertialess shutters, Aug 33 et seq.; Kerr effect, Aug 34; spark, Aug 33
Photosynthesis and respiration, Jan 24, 27, 28, 29
Phthalocyanin pigments, Jan 27
Pilotless aircraft, tactile guidance from ground, Oct 5
Pipes, renovation on site, May 6, 7
Planetary systems, evidence for, Apr 28, 32 et seq.
Planets, possible life on, Apr 34
Plant renovation and modification on site, May 6, 7
Plant senescence and death, June 31 et seq.
Plants, adaptation to wind effects, Sept 32 et seq.
Plasma: propulsion for space craft, July 16; Nov 25: research and submillimetric waves, Dec 40, 41; streams, electric power from, Jan 11; thermometer, Sept 6, 8
Plastic space stations, June 5, 6
Plastic to metal and to plastic bonding, Mar 6
Plastics: and thin shell structures, Nov 34; use of fluoro-aromatics, Mar 31
Plastiponics, Nov 4, 5
Pleistocene skulls, June 11, 13, 14
Pneumatic typewriters, July 5, 6
Poisson distribution and queueing, Jan 31 et seq.
Polygamy in weaver birds, Jan 38, 39; and food supply, Jan 38, 39
Polymer whiskers, Dec 6
Polymers, use of fluoro-aromatics, Mar 31
Polyoxymethylene, Dec 6
Population increases, Oct 43 et seq.
Porphyrins, Jan 24 et seq.: absorption spectra, Jan 26; aromatic character, Jan 26, 27; chemistry of, Jan 25; colour, Jan 26; metal complexes, Jan 24, 25
Porpoises, echo-location sense, Feb 23
Positrons, Mar 23

Post Office counter service, queueing studies, Jan 34
Potassium-argon dating, Mar 17
Poultry, antibiotic treatment for CRD in, Nov 9
Prehistoric time, determination through fossils, Sept 17
Pressure-induced changes of structure, Aug 16 et seq.
Primates, patterns of behaviour, Mar 15, 16
Proconsul Africanus, Mar 14
Promine and cancer cells, Sept 4
Propulsion systems for space craft, July 15 et seq.
Prostheses, July 9 et seq.
Protein: control by hormones in plants, June 34, 35; deficiency diseases, Aug 20 et seq.; supplementation, Aug 21, 22, 25; Oct 13
Proteins and genes, Mar 41; Apr 11 et seq.
Proton-antiproton pairs, annihilation of, Apr 17, 18
Proton emission, Oct 7
Pyroscan long-wave infrared scanner, Dec 15 et seq.

Queues and queuing theory, Jan 31 et seq.; application of mathematical analysis, Jan 31 et seq.; Post Office counter service, Jan 34

Radar, bistatic, Sept 9
Radiation: and cancer, Feb 16 et seq.; belts, Dec 23 et seq.; chemical protection from, June 24 et seq.: Aug 31; Oct 35; damage to crystals, Apr 36 et seq.: June 5; damage to living cells, June 25; dangers to astronauts, Oct 35; polarization of, July 22; synthesis of organic and biochemical compounds, May 4, 5; trapped in Earth's magnetosphere, Dec 23
Radio astronomy, interference from space activities, May 9
Radio emission in sky, sources of, Mar 24
Radio stars, Mar 25
Radio waves through Earth's crust, Sept 5
Radioactive contamination, May 8, 9; Nov 4; of oceans, Feb 8; of planets, May 8, 9; precautions against, May 8, 9
Radioactive debris, Feb 7
Radioactive substances in tobacco, Aug 7
Radiocarbon dating, Jan 16, 18
Radio iodine fall-out, Oct 4
Radioprotective chemicals, June 25, 28, 29; combination of compounds, June 29; 5-hydroxytryptamine, June 28; 5-mercaptopyridoxine, June 28; pyrogallol, June 28; sulphur compounds, June 28, 29
Radio telescopes, July 20 et seq.; and temporal variations, July 21; construction in space or on Moon, July 25; cross system, July 23; effect of Earth's atmosphere, July 25; field of view, July 21, 22; interferometers, July 22, 23; ionospheric focusing, July 23, 24; polarization of radiation, July 22; ring, July 23; semi-steerable systems, July 24, 25
Rainbow high-altitude tests, Apr 6, 7; May 8, 9
Rangers 1-IX, Mar 7; Aug 6, 50; Nov 6
Rats: electricity from, Sept 8; inherited deformities in, Mar 40, 41
Real-time telemetry (RTT), Sept 8
Reflectance spectrophotometer, Oct 25
Reflectors, giant, Jan 21 et seq.
Relativity, theory of, and gravity, Mar 34 et seq.
Respiration and photosynthesis, Jan 24, 27 et seq.
Retine and cancer cells, Sept 4
Reverse osmosis in desalination, July 40, 41
Reversible colour changes, Feb 33 et seq.
Rheumatoid arthritis: and autoimmunity, June 7; and bee-venom, Aug 28 et seq.: and thermal radiation, Dec 17; research into rheumatoid factor, June 7
Ribosomes, Apr 13,14; June 35
RNA (ribonucleic acid): and conditioned reflexes in flatworms, June 6; and genetic code, Jan 10; Apr 10; and synthesis of protein, June 35; transfer, Jan 10
Road planning by computer, Sept 18 et seq.

Sand dunes, stabilization by oil spraying, Aug 5
Saturn spacebooster, Mar 8; Nov 25, 26, 28
Sawflies, group behaviour of larvae, June 16, 17
Scanners, infra-red, Dec 14 et seq.
Science Museum, problems and developments, Mar 10, 11
Science writers' prize, Feb 9
Scientific policy, Carr Committee recommendations, Feb 8, 9
Sea food potential, Oct 46, 48
Sea, survival in, Oct 36 et seq.; decompression problems and sickness, Oct 38, 39; pressure, Oct 37, 38; psychological barriers, Oct 37; "sub-aquatic man," Oct 40
Sequential ageing of leaves, June 31, 32
Shell building structures, Nov 29 et seq.
Shell money, primitive, Dec 28 et seq.
Shutters, inertia-less, in high-speed photography, Aug 33 et seq.
Sex communication of weaver birds, Jan 40
Silicon solar cells, Aug 41, 42
Skin colour and climate, Oct 25, 26
Sleep, studies of, Nov 36 et seq.; biochemical control, Nov 39; dreaming, Nov 37, 38; electroencephalograph, use of, Nov 36; need for, Nov 38, 39; orthodox phase, Nov 36, 37, 39; paradoxical phase, Nov 36, et seq.; rapid-eye-movements, Nov 38
Snails, response to magnetism, Nov 19 et seq.
Snakes, navigation systems, Feb 26, 27
SNAP (Systems for Nuclear Auxiliary Power), Nov 5
SNAP-8 nuclear reactor, July 17 et seq.; Nov 5
Social crime and disease, Jan 7, 8
Solar: gas, impact on Earth's magnetosphere, Sept 22, 27; observatory, orbiting, Apr 21; panels in satellites and spacecraft, Aug 42; radiation satellite, Sept 8, 9; spectrum, June 37 et seq.; stream, content of, Sept 27; system, life in, Apr 34
Solar energy, Aug 38 et seq.; collection systems, Aug 39, 40; conversion to electricity, Aug 41, 42; machines, Aug 40, 41; silicon cells, Aug 41, 42
Solids, submillimetric waves and study of, Dec 42
Somatic mutations, Feb 18 et seq.
Sound, second, third and fourth, Feb 6
Space: data problems, Sept 8, 9; diary for 1962, Jan 12, 13; nuclear power in, July 14 et seq.; telescopes, Jan 22, 23
Space programmes, Jan 6; Mar 4 et seq.; May 4; July 4; Aug 6, 7, 50; Sept 4; Oct 7, 8; Nov 6, 7, 28; Dec 6, 8; co-operation between U.S.A. and U.S.S.R., May 4; Oct 7, 8
Space, survival in, Oct 31 et seq.; artificial gravity, Oct 32, 33; irritability, Oct 31; psychological problems, May 6; Oct 31; radiation dangers, Oct 35; sensory input, Oct 31; weightlessness, Oct 32 et seq.
Space-time curvature, Mar 36
Spectrophotometer, portable reflectance, Oct 25
Spectroscopy, development of, June 36, 37; Dec 37 et seq.
Spectrum, June 37 et seq.: and measuring skin colour, Oct 25; infra-red region, June 37, 38; lines, June 37; submillimetric waves, Dec 37 et seq.; ultra-violet region, June 39, 40
Staphylococcal infection, fucidin treatment, Nov 6
Starfish high-altitude tests, Apr 6, 7; Nov 5; Dec 26
Stars: dust cloud hypothesis, Apr 28; evolution of, Apr 28, 29; life on, May 36; main sequence, Apr 29; planetary systems, evidence for, Apr 29, 32 et seq.
Stellar navigation by birds, Feb 25, 26
Sterilization: and pest control, May 6; Dec 10; space probe, May 9; Nov 6, 7
Stone: circles and alignments, Jan 19, 20; tombs, Jan 17 et seq.
Stratoscope II, infra-red studies of Mars, June 38
Stress analysis and thin shell structures, Nov 34
Strontium-90, Nov 4
Structure, pressure - induced changes, Aug 15 et seq.
Structures, geodesic and tensegrity, Apr 22 et seq.
"Sub-aquatic man", Oct 40
Submillimetric waves, Dec 37 et seq.; and deep heat treatment, Dec 41; and plasma research, Dec 40, 41; and study of solids, Dec 42; atmospheric absorption, Dec 39, 40
Sulphur compounds and protection against radiation, June 28 et seq.
Sun: gamma rays from, Apr 21; gravitational field, Mar 37; infrared spectrum lines, June 38; orbiting observatory, Apr 21; Sept 4; power from, Aug 38 et seq.; Quiet Years (IQSY), May 5, 6; Sept 9; Oct 8; 'solar wind,' Feb 5; X-ray emission and photographs, June 40; Sept 4
Superconducting magnets, Feb 13, 14
Superconductivity, Jan 11; and magnetic fields, Aug 4; niobium-tin compound, Aug 4; and helium, Feb 5, 6
Supernova explosions, Mar 25, 26; Apr 17
Surveyor moon-probe programme, Mar 5; Aug 50; Nov 5
Synchronous ageing of leaves, June 32
Synclastic surfaces, Nov 33
Syncom communications satellites, Nov 50; Dec 4
Synthesis, radiation of organic and biochemical compounds, May 4, 5
Synthetic hormones and prolongation of plant life, June 31 et seq.

Tambu, primitive shell money, Dec 28 et seq.
Tektites, Mar 9
Telepathy and communication between Moon explorers, Dec 4
Telephones for deaf-mutes, Oct 5
Telepuppets, Mar 5
Telescopes, Jan 21 et seq.; atmospheric difficulties, Jan 21, 22; giant reflectors, Jan 21 et seq.; on Moon, Jan 22, 23; radio, July 20 et seq.; space, Jan 22, 23
Telstar communications satellite, Jan 9; Mar 6, 7; Apr 7
Tensegrity structures, Apr 24, 25
Tension structures, Nov 34, 35
Termites: group behaviour, June 15, 19; nest building, June 19
Thermal radiation of body; and clinical diagnosis, Dec 15 et seq.; reflected radiation,

Dec 18; scanners, Dec 14 et seq.
Thermography, Dec 15 et seq.
Thermo-nuclear fusion: containing the plasma, June 4; Soviet progress, June 4
Thin shell structures, Nov 29 et seq; anticlastic surfaces, Nov 33; high construction cost, Nov 33, 34; movable forms, Nov 34; new materials, Nov 34; strength of, Nov 31, 32; stress analysis, Nov 34; synclastic surfaces, Nov 33; tension structures, Nov 34, 35; types of shells, Nov 33; use of computers, Nov 31
Thrombosis, May 17
Thymus gland: removal of, and acceptance of skin grafts, Jan 10; Feb 5; source of lymphocyte cells, Jan 10; Feb 5
Tidal power, harnessing experiments, Sept 5, 6
Tiros satellites, Sept 8; Oct 7, 8
Titan spacecraft launching system, Aug 6
Tobacco, radioactivity in, Aug 7
Tolai people: adaptation to circumstances, Dec 31; primitive shell money, Dec 28 et seq.; traditional culture, Dec 31, 32
Tools, use by Primates, Mar 17, 18
Transistors, optical, May 4
Transit satellites and nuclear energy, Nov 5
Trend Committee report on civil research, Dec 8, 10
Tropical conditions and human survival, Oct 23 et seq.; Allen's rule, Oct 24, 25; Bergmann's rule, Oct 24, 25; body shape and climate, Oct 24, 25; dehydration problems, Oct 28: heat-stroke, Oct 24, 28: skin colour and climate, Oct 25, 26
Tsetse fly: control by chemical sterilant, Dec 10; survival in tropical conditions, Dec 45
Turbine engines for cars, Aug 8, 9
Two-station radar, Sept 9
Tylan, and treatment of CRD in poultry, Nov 9
Typewriters, pneumatic, July 6

Ultra-high energy particles, Mar 20 et seq.
Ultra-violet light and skin cancers, Oct 26: spectrum region and rocket studies, June 39, 40
UNCSAT, Apr 8, 9
Underground nuclear tests, Sept 10, 11: 'decoupling' principle, Sept 10
Undernutrition problems, Aug 22, 23
Unesco and science, Sept 5
Uranium atom model, Nov 40

Varicose ulceration and thermal radiation, Dec 17
Veins, diseased and thermal radiation, Dec 15, 17
Venus: lack of magnetic field, Feb 4; space probe observations, Feb 4; Mar 7; Apr 5; May 4; temperatures, Apr 5; June 38
Vostok space programme, Nov 28

Water: balance within plants, Sept 34; conservation in insects, Dec 44, 45; fresh, from sea, July 35 et seq.; shortages and new supplies, Oct 46, 48; welding with, Aug 6
Water-beetles, navigation system, Feb 24
Water supply, world ten-year programme, July 7, 8
Weather: automatic stations, June 4; prediction, June 4, 5; satellites, June 4; Sept 8; Oct 7, 8
Weather control, June 5; use of asphalt, April 4, 5
Weaver birds, studies of behaviour, Jan 35 et seq.: and predators, Jan 39 et seq.; breeding space, Jan 41; mating behaviour, Jan 37, 38; sex communication, Jan 40; types of dispersion, Jan 35, 36
Weevils, group behaviour of larvae, June 16
Welding with water, Aug 6
Wind effect on plants, Sept 32 et seq.
Wind forces and design of buildings, July 28 et seq.; design wind speed, July 31; dynamic effects of wind flow, July 31, 32; hygiene and ventilation, July 33, 34; lift and drag, July 29, 30; pressure distribution, July 30, 32, 34; tunnels and models, July 34
Wings, evolution of, Mar 8
World Health Organisation, July 5; Aug 21
Worms, response to magnetism, Nov 20, 21

X-rays: and aurora, Sept 27; emission from Sun, June 40; Sept 4; from stars, Sept 4, 6; instant, Feb 9; photograph of Sun, June 40
Xi-zero anti-particle, Oct 6

BOOKSHELF INDEX

About the Universe, Ian F. Rolls (Mills and Boon), Feb 44
Advances in Space Technology, ed. by J. L. Nayler (Newnes), Apr 46
Alan Works with Atoms, S. Makepeace-Lott (Chatto and Windus), Apr 51
Animal Ecology: Aims and Methods, A. MacFadyen (Pitman), Apr 52
Architecture of Matter, The, Stephen Toulmin and June Goodfield (Hutchinson), Jan 43
Astronautical Engineering and Science, ed. E. Stuhlinger *et al.* (McGraw-Hill), Sept 44
Astronomy with Binoculars, James Muirden (Faber), Aug 46
Atomic Physics Today, Otto R. Frisch (Oliver and Boyd), Feb 43
Autobiography of Science, The, ed. F. J. Moulton and J. S. Schifferes (Murray), May 44
Balance of Nature, The, Lorus J. Milne and Margery Milne (Macdonald), Jan 45
Biological Receptor Mechanisms, ed. J. W. L. Beament (C.U.P.), Apr 48
Boundaries of Science, The, Magnus Pyke (Penguin), Mar 44
Cancer and Public Education, John Wakefield (Pitman Medical), Oct 54
Careers in Technology, Maurice Goldsmith (Penguin), Sept 45
Case against the Nuclear Atom, The, Dewey B. Larson (North Pacific Publishers), July 46
Charles Darwin, Sir Gavin de Beer (Nelson), Dec 54
Clouds, Rain and Rainmaking, B. J. Mason (C.U.P.), Feb 42
Common Sense about Smoking, C. M. Fletcher *et al.* (Penguin), Mar 44
Comparative Physiology of Vertebrate Respiration, G. M. Hughes (Heinemann), Aug 45
Concept of the Positron, The, Norwood Russell Hanson (C.U.P.), Apr 47
Conference on Space-Age Planning, (NASA), Oct 52
Conquest, David Alman (Harrap), July 47
Continental Drift, ed. by S. K. Runcorn (Academic Press), Feb 41
Culture and the Evolution of Man, ed. M. F. Ashley Montagu (O.U.P.), May 46
Daily Express Science Annual No. 2, Chapman Pincher (Oldbourne Press), Dec 54
Design and Function at the Threshold of Life: the Viruses, H. Fraenkel-Conrat (Academic Press), Jan 42
Dictionary of Scientific Units, A, H. G. Jerrard and D. B. McNell (Chapman and Hall), Sept 44
Directory of British Scientists—1963 (Benn), June 46
Discoverers of Blood Circulation, Tibor Doby (Abelard-Schuman), Nov 43
Discovering the Universe, Bernard and Joyce Lovell (Ernest Benn), Dec 54
Discovering the World of Science, Van Nostrand Science Programme (Van Nostrand), Sept 44
Discovery of Neptune, The, Morton Grosser (Harvard University Press and O.U.P.), Jan 45
Doubt and Certainty in Science, J. Z. Young (O.U.P.), May 44
Electronics in Industry, J. S. Murphy (O.U.P.), July 44
Energy, Bruce Chalmers (Academic Press), Aug 47
Engineering Design, D.S.I.R. Report (H.M.S.O.), Sept 44
Engineering Heritage, Institute of Mechanical Engineers, (Heinemann), Dec 52
Erosion and Sedimentation, Henri and Geneviève Termier (Van Nostrand), Sept 45
Evolution of Stars and Galaxies, Walter Baade (Harvard University Press), July 47
Exploring the atmosphere, G. M. B. Dobson (O.U.P.), Apr 48
Exploring the World of Science, Van Nostrand Science Programme (Van Nostrand), Sept 44
Fifth Planet, Fred Hoyle and Geoffrey Hoyle (Heinemann), Nov 43
Fifty 'Observer' Brain-Twisters, D.St.P. Barnard (Faber), Feb 44
Flash of Genius, The, Alfred B. Garrett, (Van Nostrand) Nov 44
Four Ways of Being Human, Gene Lisitzky (Dennis Dobson), Nov 46
From Galileo to Newton 1630-1720, Rupert Hall (Collins), June 46
Frontiers in Brain Research, ed. John D. French (Columbia University Press), May 43
Fun with Archaeology, C. A. Burland (Ward), Apr 50
Galileo and Experimental Science, R. B. Marcus (Chatto and Windus), Apr 50
Games, Gods and Gambling, F. N. David (Griffin), May 43
Great Ideas and Theories of Modern Cosmology, Jagjit Singh (Constable), Apr 42

Harnessing Space, ed. by Willy Ley (Macmillan), Nov 45

Heredity and Human Life, Hampton L. Carson (Columbia University Press), Sept 46

History of Domesticated Animals, A, Frederick E. Zeuner (Hutchinson), Apr 44

How the Executive Spends his Time, George Copeman, H. Luijk and F. de P. Hanika (Business Publications), Dec 52

Ideas of Biology, The, John Tyler Bonner (Eyre and Spottiswoode), Apr 42

Insect Factor in Wood Decay, The, Norman E. Hickin (Hutchinson), Mar 43

Introducing Science, Alan Isaacs (Penguin), Apr 48

Introduction to the Philosophy of Science, An, Arthur Pap (Eyre and Spottiswoode), July 44

Inventing the Future, Dennis Gabor (Secker and Warburg), June 42

Isotopes in Action, Dorothy Harper (Pergamon Press), Aug 46

Language of Science, The, William Gilman (English Universities Press), May 44

Learning and Instinct in Animals, W. H. Thorpe (Methuen), May 44

Life: Origin and Development, Gösta Ehrensvärd (University of Chicago Press), Mar 43

Literature and Science, Aldous Huxley (Chatto and Windus), Nov 43

Living Landscape of Britain, The, Walter Shepherd (Faber), June 45

Magnetism, E. W. Lee (Penguin), Apr 48

Manager's Guide to Operational Research, A, Patrick Rivett and Russell L. Ackoff (Wiley), July 42

Man and Energy, A. R. Ubbelohde (Penguin), Apr 52

Man and his Future, ed. G. Wolstenholme (Churchill), Sept 42

Man and Science, W. Heitler (Oliver and Boyd), Sept 45

Man Learns to Measure, K. W. Irwin (Dobson), Apr 50

Marine Microbiology, A. E. Kriss (Oliver and Boyd), Apr 48

Men and Discoveries in Chemistry, Bryan Morgan (John Murray), Jan 45

Microbes at Work, Millicent E. Selsam (Chatto and Windus), Apr 50

Million Years of Man, A, Richard Carrington (Weidenfeld and Nicolson), Oct 50

Miracle Drugs, H. M. Bottcher (Heinemann), Nov 45

Missiles and the Revolution in Warfare, Nels A. Parsons (Harvard University Press and O.U.P.), Apr 42

Modern Automation, David Foster (Pitman), Apr 47

Modern Physics: an Introduction to Atomic and Nuclear Physics, D. E. Caro, J. A. MacDonell and B. M. Spicer (Edward Arnold), Jan 44

Moon, Meteorites, and Comets, The, ed. by Barbara M. Middlehurst and Gerard P. Kuiper (University of Chicago Press) Nov 46

More Mathematical Puzzles and Diversions, Martin Gardner (Bell), June 45

Nature of Biochemistry, The, Ernest Baldwin (C.U.P.), Feb 43

Night Sky at Rhodes, Stephen Toulmin (Methuen), Dec 54

Oceans, ed. by G. E. R. Deacon (Paul Hamlyn), Jan 44

One Two Three . . . Infinity, George Gamow (Macmillan) June 46

Origin of Races, The, Carleton S. Coon (Cape), July 44

Origins of Scientific Sociology, The, John Madge (Tavistock Publications), Sept 42

Our Emerging Universe, Allan Broms (Muller), Aug 46

Our Synthetic Environment, Lewis Herber (Cape), Feb 44

Penguin Science Survey—A and B, eds. Arthur Garrett, S. A. Barnett and Anne McLaren (Penguin), May 44

Physics in the Sixties, ed. by S. K. Runcorn (Oliver and Boyd), Oct 50

Plants that Changed the World, Bertha S. Dodge (Phoenix House), Apr 51

Porpoises and Sonar, Winthrop N. Kellog (University of Chicago Press), Aug 44

Practical Mathematics for Chemists, F. H. C. Kelly (Butterworths), Sept 45

Prehistory and the Beginnings of Civilisation, Jacquetta Hawkes and Sir Leonard Woolley (Allen and Unwin), Aug 44

Proving Ground, Neal O. Hines (University of Washington Press), Mar 42

Psychology through Experiment, ed. G. Humphrey (Methuen), May 44

Races of Man, Sonia Cole (British Museum, Natural History), May 44

Radiation Hazards and Protection, D. E. Barnes and D. Taylor (Newnes), Apr 46

Radio Astronomy for Amateurs, Frank W. Hyde (Lutterworth Press), Feb 41

Radio Astronomy Simplified, John Heywood (Arco), Oct 54

Realm of Science, The, Charles-Noël Martin (Harrap), Dec 50

Recent Advances in Conservation, ed. G. Thompson (Butterworth), May 46

Rutherford at Manchester, ed. by J. B. Birks (Heywood), Mar 43

Rocket City, U.S.A., Erik Bergaust (Macmillan), Sept 45

Science and Politics, Lord Hailsham (Faber), July 42

Science and Secrets of Early Medicine, Jürgen Thorwald (Thames and Hudson), Dec 50

Science and Sensibility: Vols I and II, James R. Newman (Allen and Unwin), Mar 43

Science in Archaeology, Don Brothwell and Eric Higgs (Thames and Hudson), Nov 42

Science, Industry and Social Policy, Kenneth Denbigh (Oliver and Boyd), July 47

Science in Industry: Electricity, Leslie Hunter (Burke), Sept 45

Science in Industry: Metals, S. E. Gamarekian (Burke), Sept 46

Science in Sixth-form General Education, Association for Science Education (Murray), Aug 47

Science of Animal Behaviour, The, P. L. Broadhurst (Penguin) Oct 54

Science of Life, The, G. Rattray Taylor (Thames and Hudson), June 41

Science Out of Doors, (Longmans), July 46

Scientific Cl ge, A. C. Crombie (Heinemann), 1 42
